

TuffJet Cards

Tear-Resistant Paper

SwiftColor’s TuffJet cards combine durability with sustainability. Designed with a PET film core and an inkjet-receptive coated paper surface, they offer exceptional tear resistance, rigidity, and stability with excellent printability.

TuffJet is made out of a hard-wearing composite material consisting of a 100 µm PET film core and white, natural coated paper surfaces. The three-layer product structure is robust, resistant to edge tearing, water impermeable and suitable for certain outdoor applications. It can be cut, punched, perforated, drilled, embossed, scored, folded, glued and bound without issue.

These thermostable, water-impermeable cards provide a long-lasting solution while being an eco-friendly alternative to traditional PVC media.

Sustainability Benefits

- **Eco-Friendly Composition:** Up to 80% paper content, reducing plastic use.
- **Certified for Sustainability:** FSC® Certified, ISO Certifications, and EcoVadis CSR Silver Medal
- **Free From Harmful Chemicals:** No plasticizers, PVC, BPA, solvents, poisons, or heavy metals.
- We’re committed to innovation with ongoing research to improve sustainability.

TuffJet Card Specifications	
Weight	255 g/m ²
Thickness	235 µm
Surface Papers	Inkjet-receptive coated
Core	100 µm PET film
Opacity	> 92%
Storage Conditions	20±5°C and 50±10% rel. humidity
Storage Time	At least 3 years
Recyclable	Paper fibers can be recovered through standard recycling
